

Volume 556, April, 2021

CONTENTS

Abstracted/indexed in BIOSIS, Biological Abstracts, Chemical Abstracts, Current Contents (Life Sciences, Clinical Medicine), EMBASE, Excerpta Medica, Genetics Abstracts, Immunology Abstracts, MEDLINE®, Research Alert, Science Citation Index, Tropical Diseases Bulletin, Virology and AIDS Abstracts. Also covered in the abstract and citation database Scopus®. Full text available on ScienceDirect®.

Highlighted Articles

Coronavirus infection induces progressive restructuring of the endoplasmic reticulum involving the formation and degradation of double membrane vesicles Elaine M. Mihelc, Susan C. Baker and Jason K. Lanman 9

The pharmacology of plant virus nanoparticles Christian Isalomboto Nkanga and Nicole F. Steinmetz 39

Regular Articles

The porcine deltacoronavirus accessory protein NS6 is expressed in vivo and incorporated into virions Pan Qin, Wen-Ting Luo, Quan Su, Pengwei Zhao, Yuqi Zhang, Bin Wang, Yong-Le Yang and Yao-Wei Huang 1

Mature viral cathepsin is required for release of viral occlusion bodies from Autographa californica multiple nucleopolyhedrovirus-infected cells Jeffrey J. Hodgson, Peter J. Krell and A. Lorena Passarelli 23

Characterization of porcine circovirus-like virus P1 replication and lesions in BALB/c mice Libin Wen, Xiaojing Gao, Shaoyang Sheng, Qi Xiao, Wei Wang and Kongwang He 33

Potential APOBEC-mediated RNA editing of the genomes of SARS-CoV-2 and other coronaviruses and its impact on their longer term evolution Jeremy Ratcliff and Peter Simmonds 62

Virome characterization in serum of healthy show pigs raised in Oklahoma demonstrated great diversity of ssDNA viruses William P. Paim, Mayara F. Maggioli, Matheus N. Weber, Grant Rezabek, Sai Narayanan, Akhilesh Ramachandran, Cláudio W. Canal and Fernando V. Bauermann 87

Construction and biological characterization of an infectious full-length cDNA clone of a Chinese isolate of Wheat yellow mosaic virus Fan Zhang, Shuang Liu, Tianye Zhang, Zhuangxin Ye, Xiaolei Han, Kaili Zhong, Jian Yang, Jianping Chen and Peng Liu 101

Experiments and simulation on ZIKV NS2B-NS3 protease reveal its complex folding Ankur Kumar, Prateek Kumar, Murali Aarthy, Sanjeev Kumar Singh and Rajanish Giri 110

Characterization of pseudotyped vesicular stomatitis virus bearing the heartland virus envelope glycoprotein Miyuki Kimura, Kazutaka Egawa, Tatsuhiko Ozawa, Hiroyuki Kishi, Masayuki Shimojima, Satoshi Taniguchi, Shuetsu Fukushi, Hikaru Fujii, Hiroshi Yamada, Long Tan, Kaori Sano, Harutaka Katano, Tadaki Suzuki, Shigeru Morikawa, Masayuki Saijo and Hideki Tani 124

Exploring the efficacy of naturally occurring biflavone based antioxidants towards the inhibition of the SARS-CoV-2 spike glycoprotein mediated membrane fusion Samiran Mondal, Abhijit Karmakar, Tamanna Mallick and Naznin Ara Begum 133
